Conclusion

1. EDIT Value tool is useful for Polish enterprises
2. Gaining the acceptance and agreement for work is the hardest element of cooperation
3. Enterprises protect their data on the enterprise, which influences the information flow
4. The knowledge on the competitors is rather poor in the enterprises
5. Setting the priorities is hard for the companies to be accepted unless it is negotiable
6. The main reason for implementation and cooperation are economical motivators

Discussion and questions

Thank you for attention.
