

Speaker Profile

Giovanni Tosi

Cosmob Spa

Short CV

Giovanni Tosi is employed in Cosmob since April 2012 and he got degree in Ecology of Climate Change (Science for the Environment). The main expertise gained during the working experience is about research activities aimed at the increasing of the eco-sustainability of products and processes, ensuring at the same time a higher competitiveness of enterprises belonging to the wood-furniture sector. More in detail, the research activities have been developed with particular reference to sustainable materials for furnishings manufacturing, able to guarantee high performances and, at the same time, reduced production costs.

The purpose for the next period is to continue toward this direction, also taking into account another industrial sector of Marche Region (footwear), especially considering the possibility of teaming up with a body active within the reference territory such as the University of Camerino. In this sense, Giovanni Tosi has recently started a doctorate financed by University of Camerino, Cosmob and Marche Region.
